TAIF FALEH ALOSAIMI

Full Stack Developer | Software Engineer

Riyadh | +966 54 101 2959 | taif7falibrahim@gmail.com | LinkedIn | GitHub

Professional Summary

Full-stack developer with a strong foundation in programming, software development, and web development. Hands-on experience building web applications and technical solutions through intensive training at Tuwaiq Academy and multidisciplinary hackathon projects. Experienced in applying object-oriented programming, database concepts, system design, and software development principles to build practical solutions, with additional experience in AI-driven projects.

Experience

Tuwaiq Academy – Web App Development Using Python - *Trainee* July – October 2026

- Developed web applications using Python and Django, applying object-oriented programming and structured, reusable code.
- Designed and implemented responsive web interfaces using HTML and CSS, with a focus on structured and user-friendly layouts.
- Implemented core application functionality using Django models, ORM, forms, validation, templates, sessions, and cookies.
- Used Git and GitHub for version control and project management.
- Applied technical knowledge through hands-on development projects during the intensive training program.

Key Projects

Bayyen & Fazza – Construction Project Management Platform & Live Monitoring Robot *October 2026* | Repository

Top 8 out of 80 projects nationwide | Expo 2030 Riyadh Challenge (MiSK Foundation × Tuwaiq Academy)

- Built a construction project management platform using Python/Django for task assignment, progress tracking, and multi-step reviews.
- Implemented role-based access control and dedicated dashboards for three stakeholder roles; designed relational data models using Django ORM/SQLite.
- Collaborated with the team to integrate access to Fazza, an ESP32-based robot providing real-time environmental readings via WebSocket and live camera streaming over HTTP.

DST Photobooth – Full-Stack Booking Website *October 2026* | Repository

Built and deployed a full-stack booking platform using Django, SQLite, HTML, and CSS to manage photobooth packages and event bookings through a database-driven system. Implemented Django Models, ModelForms, validation, ORM, and Admin, with a responsive Arabic-first interface.

Asir360 – Smart Tourism App *Aseer Innovates Hackathon 2025*

Co-led the project concept and development, contributing to UI/UX design; qualified among 780 teams.

Rasid – Early Wildfire Detection Satellite *Saudi Space Agency – SARYI Program 2025*

Led the team and developed the system concept for an early wildfire detection solution; selected among the Top 50 of 480 teams.

PlanetsTalk – Educational Interactive Game *NASA Space Apps Challenge 2024*

Co-developed an AI-powered educational game using NASA exoplanet data; led UI/UX design and prototype.

Education

Bachelor of Science in Physics 2021 – 2026

Shaqra University GPA: 4.50 / 5 | **Second Class Honors**

Skills

Programming: Python | JavaScript

Web Development: HTML5 | CSS3 | Responsive Web Design | Django | REST APIs | API Integration

Databases: SQLlite | Django ORM | Database Models | CRUD

Development Tools: Git | GitHub | CLI | Virtual Environments | Render

Data & File Handling: JSON | File Handling

Soft Skills: Leadership | Teamwork | Problem Solving | Critical Thinking | Project Coordination | Communication

Languages

Arabic: Native | English: Advanced
